Education

Adamas University, Kolkata

Aug 2023 – May 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering; SGPA (Avg): 8.55/10

Technical Skills

Languages: C, C++, Java, Python, JavaScript, SQL

Frameworks/Libraries: React.js, Node.js, Tailwind CSS, Bootstrap, Matplotlib, Scikit-learn, PyTorch

Developer Tools & Databases: Postman, Git/GitHub, Linux, Docker, MySQL Workbench, Firebase, MySQL, MongoDB, Flask

Familiar With: REST APIs, System Design, AWS

Projects

NewsSphere | Live Site | GitHub

React.js, Firebase, Express.js, MongoDB, REST APIs

- Designed a full-stack social platform enabling users to share posts, confessions, and podcasts, increasing user engagement by **40%** through likes, comments, and personalized content interactions.
- Built RESTful APIs and MongoDB-backed data management with responsive React interfaces, improving content loading efficiency by **30%** via optimized API and database operations.

AI-Based Cataract Detection Mobile App | Live Site | GitHub

React Native, PyTorch, FastAPI, OpenCV

- Developed an AI-powered cataract detection app using Swin Transformer Tiny, achieving **95.85%** validation accuracy on **15,597** eye images.
- Implemented image preprocessing, ROI extraction, augmentation, and super-resolution techniques, and integrated FastAPI APIs with a React Native app for real-time screening.

ResearchMind: Multi-Agent AI Research Assistant | Live Site | GitHub

Streamlit, LangChain, Google

Gemini, Astra DB, Tavily Search, Python, RAG

- Developed a multi-agent AI research platform using LangChain, Google Gemini, and Tavily Search with specialized Search, Reader, Writer, Critic, and Document Retrieval agents for automated research generation.
- Architected a **RAG(Retrieval-Augmented Generation)** pipeline using Astra DB vector storage and Streamlit, enabling semantic search, PDF-based question answering, web intelligence gathering, and structured report generation.

Experience

Machine Learning Intern | CodSoft | Offer Letter

Virtual Internship — Apr 2026

- Worked on Machine Learning and Deep Learning projects involving NLP, preprocessing, feature engineering, model training, and evaluation using Python, Scikit-learn, TensorFlow, and Keras.
- Built and deployed ML applications using Flask, FastAPI, Streamlit, Docker, and Google Colab for real-time prediction and interactive visualization.

Full Stack Developer Intern | CyCoders' club

May 2025 – July 2025

- Developed a scalable university management system using the MERN stack, supporting **200+ student records**, with secure JWT authentication and modular REST APIs.
- Optimized React components, reducing page load time by **25%** and improving UI responsiveness across devices.

Achievements

- Competitive Programming | *LeetCode* | *GeeksforGeeks* | *HackerRank*: Solved **350+** problems on LeetCode and **300+** on GeeksforGeeks, earning **Gold Badge** in C/C++ and Java and **Silver Badge** in Python on HackerRank.
- Certifications: Completed **Machine Learning & Data Science (GeeksforGeeks)**, *CSS, Python, JavaScript (Udemy)*, *HackerRank Software Engineer Intern* and *Full Stack Web Development (GeeksforGeeks)*.
